🚀 PROFESSIONAL SUMMARY

Third-year BCA student and aspiring Frontend Developer with strong skills in React.js, JavaScript, HTML, CSS, Java, and modern web development. Experienced in building responsive web applications, hackathon projects, and user-focused interfaces with a strong understanding of Data Structures, OOP, and Operating Systems. Passionate about creating scalable and interactive digital solutions while continuously learning new technologies and improving problem-solving abilities.

🎓 EDUCATION

Bachelor of Computer Applications (BCA)

KES Shroff College, Mumbai University

2024 – Present

Higher Secondary (CBSE)

2024

💻 TECHNICAL SKILLS

Programming Languages:

Java, JavaScript, C, C++, Python, PHP

Frontend Development:

HTML5, CSS3, JavaScript, React.js, Bootstrap, Tailwind CSS, Responsive Web Design

Backend & Database:

Node.js, PHP, MongoDB, MySQL

Core Computer Science:

Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems

Tools & Platforms:

Git, GitHub, VS Code

Soft Skills:

Problem Solving, Team Collaboration, Quick Learning, Communication Skills

🚀 PROJECTS

🏥 Hospital Management System (Web Application)

- Developed a responsive web application to manage patient records and hospital workflows
- Implemented features including patient listing, detailed profiles, admission tracking, and unique ID generation
- Improved data organization and usability through structured UI design

🎓 Student Management System (C Programming)

- Built a system using arrays, linked lists, stacks, and queues for efficient data handling
- Implemented functionalities such as insert, delete, search, sort, and undo operations
- Strengthened understanding of core data structures and memory handling

🗣️ Student Help Desk System with Chatbot (Hackathon Project)

- Designed a web-based help desk platform with chatbot functionality to automate student query handling
- Enabled faster response handling and reduced manual intervention
- Applied logical design and basic AI concepts for query resolution

AI-Based Recycling System (Hackathon Project)

- Developed a concept-based platform focused on smart waste management using AI principles
- Designed user interface to guide users in identifying and managing recyclable materials
- Addressed real-world environmental challenges through technology-driven solutions

Generative AI Informational Website

- Created a structured multi-page website explaining Generative AI concepts and applications
- Improved content clarity and accessibility for non-technical users
- Demonstrated ability to present complex topics in simplified form

Marvel-Themed Website

- Designed an interactive and responsive frontend inspired by Marvel Studios
- Focused on UI/UX design, layout structuring, and visual appeal
- Enhanced frontend development and creative design skills

Personal Portfolio Website

- Built a responsive personal portfolio showcasing projects and technical skills
- Improved online presence and project visibility for recruiters
- Planned upgrade using React for better interactivity

ACHIEVEMENTS & ACTIVITIES

-  Secured **2nd Prize in a College Hackathon**, demonstrating strong problem-solving and development skills
- Selected among **Top 5 Participants in an Inter-College Competition**, showcasing technical and analytical abilities
- Actively building and maintaining projects on GitHub with continuous learning and improvement
- Regularly practicing coding and exploring new technologies beyond academic curriculum
